ABOUT ME

I'm a motivated Computer Science student looking for an internship to get real-world experience. I have a good understanding of Blockchain technology, smart contracts there is a Project which i wrote in solidity which u can also check out on my Github, and project management. I'm dedicated to improving processes, achieving goals, and collaborating well with different teams. patience is my strength i handle things deliberately. I make a lot of mistakes at the same time i learn something from them that's what drive me make more mistakes, and the curiosity never dies.

KEY COMPETENCIES

Basics of Blockchain	Node, Github	Report writing and presenting
Writting Smart contracts in solidity	C,C++,HTML,JS,CSS	Critical thinking skills
Frontend Web development	Designing(SRS Model Diagrams)	Communication skills

PROFESSIONAL EXPERIENCE

Click Enterprises

IT Consultant

Oct 2023 - Present

I play a crucial role as an IT consultant, guiding the organization towards technology-driven decisions aligned with strategic goals. Analyzing problems and implementing technical solutions, I focus on enhancing IT infrastructure and leading web development projects. By integrating innovative technologies, I help businesses maintain competitiveness in the dynamic digital environment.

Bytewise Limited

Frontend Fellow

June 2024 - Oct 2024

Getting into the world of blockchain is my priority but what if i end up with a project which is not user friendly, that's why i used my leisure time of my summer vocations to be an lternee at Bytewise. i will be working on these technologies HTML-5, CSS-3, SASS, Tailwind CSS, JS, Advanced JS, React JS, Git, Github, Node js

VANAR

Brand Ambassador

Aug-2024-Present

Started exploring the blockchain community this year by joing a Highly scalabale L1 Blockchain company, successfully signed MOU between my university and Vanar.
